

Reported model: 290,943 parameters. The branch is 238,028 of them, and the fusion it requires a further 32,896: 93 % together.

Built and measured, not retained:

Adaptive alignment
whitens by $M^{-1/2}$
substitute for the branch

Cross-epoch transformer
594,816 parameters
costs accuracy

Selective head
coverage-constrained
no usable reject option
